arginine or arginine supplements also increase the availability of amino acids such as L-arginine in the body. L-arginine is needed for the production of L-glutamine, which is a neurotransmitter used in the development of growth in the brain. L-glutamine is also needed for the maintenance of mood, activity, and normal sleeping patterns in people. Also, while L-glutamine is the major glutamate transporter into the brain, L-arginine has a role in the metabolism of glutamate to L-glutamate. The function of L-arginine supplements on behavior is unclear, but there is a suggestion that L-arginine plays an important role in the development and functioning of the immune system, the cardiovascular system, and the central nervous system. L-arginine is widely used in both human and animal experiments to stimulate peripheral resistance.

Healing Hyperbaric oxygen therapy: Hyperbaric Oxygen Therapy, (HBOT), also referred to as undersea hyperbaric oxygen therapy, oxygen therapy or hyperbaric oxygen treatment, is a high-dose technique for treating a number of medical conditions. - The treatment is related to the treatment of decompression sickness, though the overall objective is different. - The reason one considers hyperbaric oxygen therapy is that some substances (and processes) in the body are enhanced by a high concentration of oxygen. The pressure increases the oxygen concentration in the body tissue. This effect may
