The BitNami ownCloud Stack is a pre-configured instance of the ownCloud software stack, built on top of the best open-source components. The advantage of using a pre-configured instance like this one is that you do not need to configure any application or services, everything will be done automatically. The ownCloud Stack is the ideal solution for companies or organizations that want to offer their users an ownCloud instance without having to deal with system administration. ownCloud Stack Installation: Simply install ownCloud on top of your existing system and BitNami will do the rest. If you prefer to install on your own, please see the corresponding section of the documentation. Supported Platforms: The BitNami ownCloud Stack is compatible with the following operating systems and versions: BitNami ownCloud Stack 1.7.5 Mac OS X 10.7 - 10.13 Windows 8, Windows Server 2012 BitNami ownCloud Stack Features: BitNami ownCloud Stack is designed to work with the following components: Notes: The auto-install of ownCloud needs a few minutes to be completed. In the autostart process of your ownCloud instance you will be asked if you want to store your files in your home directory and if you want to use it as your main file server. If you prefer to store your files in your home directory, you can easily change it in the ownCloud settings. As long as you only have a single instance of ownCloud installed on your computer, there will be no problem using the instance you just installed. If you need to synchronize more than one instance, consider using the BitNami Cluster service. Every time you install ownCloud on top of your existing system, you will be asked if you want to use your existing data directory. You can always use BitNami ownCloud Stack to easily use your ownCloud instance, even if you do not want to install any new software on your existing operating system. If you have a dedicated server or you are using a virtual machine, you might want to use BitNami ownCloud Stack in order to speed up the process of installing ownCloud. BitNami ownCloud Stack Upgrade: BitNami ownCloud Stack 1.7.5 to 1.8.0: 1. You need to change your ownCloud.conf.
