Adobe Photoshop is now a totally different beast than it once was. Lightroom can no longer easily stand beside Photoshop as a photo editing tool and this makes it less attractive for professional photographers and illustrators. Apple Lightroom won't get noticed if it is displayed in a museum, that's for sure. The downside is that it is now Mac-only, which is a bit of a tragedy. If Lightroom was free on Windows and Mac OS X, more developers would be interested in supporting it. So, Adobe is charging a very comfortable price for users of either operating system to get the software. However, it is important to keep in mind that branding is still a powerful tool for Adobe and the Lightroom brand currently seems to be a great fit for their software. **Adobe Photoshop:** Lightroom 5 is completely different from the previous versions. And even if you only get a fraction of the features Photoshop CS6 had, it is far ahead of the competition. Product innovation is an exciting part of Adobe. Take, for example, the recent iteration of the digital dual screen Mac Pro. The power of the Mac Pro allows users to do more than they've ever done - or could have ever dreamed of.
